

NMR Spectroscopist / Separation Scientist

Description

Job Description – Novatia, LLC was founded in 2000 with a mission to develop high-value products and services based on our expertise in automation, software development, and analytical / synthetic / biological chemistry. Our team of experienced scientists serve a wide variety of clients in the chemical, pharmaceutical and life science industries. We are currently seeking to add a highly qualified NMR Spectroscopist / Separation Scientist to join our Pharmaceutical Development Support Team working full-time on-site at our Newtown, PA location. Candidates should apply on Indeed at the following link: https://www.indeed.com/viewjob?jk=a9bde8dc165814a1&from=rjp_mob.careerGuideRecs&rjptk=1gqs939ink7bf801

Responsibilities –

- Design and execute NMR studies on a variety of compounds ranging from small molecules to biomolecules in support of client needs
- Participate as a team member analyzing chemical degradation pathways and in the isolation and determination of drug substance impurity and drug product degradant structures
- Interface with clients in setting research objectives and delivering progress reports
- Analyze data independently or as part of a multidisciplinary research team
- Prepare and communicate written technical reports
- Assist in maintaining and servicing NMR instrumentation
- Promote current NMR offerings and help explore new business opportunities

Qualifications –

- Ph.D. degree in Organic, Medicinal or Natural Products Chemistry with proficiency utilizing NMR spectroscopy for structure elucidation and research problem solving
- Experience with chromatographic separation science, biological NMR or mass spectrometry is also highly desirable
- Strong verbal and written communication skills
- Excellent hands-on, technical problem-solving aptitude and ability
- Desire to acquire expertise with other analytical techniques
- Goal-orientated team player with entrepreneurial spirit
